CREATOR MODE · PARENT GUIDE

Creator Quest

Everything you need to know to be your kid's co-pilot. Read this in 10 minutes, then let them take the wheel.

Creator Mode is an independent course. It is not made, sponsored or endorsed by Roblox Corporation or Anthropic. Roblox and Roblox Studio are trademarks of Roblox Corporation. Claude is a product of Anthropic.

START HERE

What's in the download

File	What it is
Creator Quest.html	The game your kid plays through. Double-click to open it in Chrome, Edge or Safari. XP, levels, badges, 8 missions, a prompt mini-game and the 3D Vault browser. Progress saves in that browser.
Creator Vault folder	118 ready-made Roblox models in 10 packs (.rbxmx files). 46 of them have scripts inside and work as soon as you press Play: coins, checkpoints, jump pads, portals, pets, swords.
Rescue Scripts folder	A tested script for each of Missions 1–7. If Claude's version breaks and you can't fix it, paste the rescue script and keep going.
Parent Guide.pdf	This guide.

The co-pilot rule

Claude's terms require users to be 18 or older. So Creator Quest is built for **you and your kid together**: Claude runs on your account, on your screen, with you in the room. Your kid reads the mission, edits the prompt, does the building in Roblox Studio and the testing. You paste prompts into Claude and copy the answers back. At the end of each mission, you hold the "stamp" button to complete it.

What you need

- A Windows PC or Mac. Roblox Studio doesn't run on phones, tablets or Chromebooks.
- Roblox Studio, free from **create.roblox.com**.
- A Roblox account for your kid. Turn on Parental Controls for under-13s.
- A Claude account for you at **claude.ai**.

Free or paid Claude?

The free plan works for getting started. The Mega Prompts ask Claude for long scripts (150–300 lines), so on the free plan you may hit the daily message limit after a mission or two. A paid plan makes longer sessions smoother. Either way, the rescue scripts mean you're never stuck.

Each mission has 5 stages

1. AI Brain	A short lesson about how AI works, plus a 2-question quiz. Read it together.
2. Build	Setup checklist, the **Mega Prompt** (one prompt that makes Claude write a whole game system), and a "test it" checklist.
3. Boss Bug	A short piece of real code with one bug. Your kid taps the broken line.
4. Power-ups	Extra prompts that add features. Kids pick what sounds fun.
5. Finish	A conversation question for you, then you hold the stamp button.

THE MISSIONS

From first obby to published game

#	Mission	What your kid builds	AI lesson
1	**Lava Tower** 45 min	A 25-stage spiral obby over a lava lake with elevators, spinning lasers, vanishing blocks, checkpoints and a win pad	What AI is: a prediction machine
2	**Coin Rush** 50 min	Spinning coins, Gold Rain events, a shop with Speed Boots, Moon Jump and Giant Mode, and saving	Prompting: what, where, how
3	**Tycoon Factory** 60 min	A full tycoon: claim pad, droppers, conveyor, collector, 7 upgrades and a Golden Statue	Breaking big jobs into steps
4	**Zombie Night** 60 min	A night-time graveyard, swords, zombie waves, giant zombies every 5th wave	AI makes mistakes: always test
5	**Pet Hatchery** 55 min	Gems, a mystery egg, 5 rarities, 8 pet types that follow you and boost gems	Chance and patterns in AI
6	**Round Arena** 60 min	A lobby + countdown + round loop with Falling Tiles and Rising Lava modes and an on-screen timer	Staying safe online
7	**Boss Battle** 60 min	A giant boss with a health bar, ground slams, meteor rain and rage mode	Iterating with feedback
8	**Dream Game** 2+ hours	Their own game, designed with the Dream Game Designer, built with the Vault, playtested and published	You're the creator: originality and honesty

Each mission starts in a fresh Baseplate place. Mission 8 is where everything gets combined.

Conversation starters (one per mission)

1. How is Claude different from a friend?
2. What made your second prompt better than your first?
3. What's a big job at home we could break into small steps?
4. When could AI be wrong about something besides code?
5. Why might a game make Mythic pets so rare?
6. What would you do if someone online made you feel uncomfortable?
7. What's something you got better at by practicing?
8. Who should get credit when you build something with AI?

WHEN THINGS GO WRONG

Troubleshooting

Problem	Fix
Nothing happens when we press Play	Check the script is inside **ServerScriptService** (not Workspace) and that it's a **Script**, not a LocalScript. Open View › Output and look for red text.
Red error in Output	Copy the whole red line plus the script and send both to Claude: "Here's my error: … Here's my script: … What's wrong?"
Claude's answer got cut off	Type "continue". Or ask "Give me the full script again in one piece."
We've tried three fixes and it's still broken	Use the rescue script from the Build stage (or the Rescue Scripts folder). Then ask Claude to add your changes on top of it.
Coins don't save (Mission 2)	Saving needs a published game. File › Publish to Roblox, then Home › Game Settings › Security › turn on "Enable Studio Access to API Services".
Two scripts are fighting	Each mission should be its own place. Start a new Baseplate for each one.
Insert from File doesn't show the Vault files	Unzip the download first. Then right-click Workspace › Insert from File and browse to the Creator Vault folder.
Creator Quest progress disappeared	Progress is saved in the browser you used. Use the same browser on the same computer, and don't use a private window.

Online safety

- Publish games as Private or Friends only at first (Game Settings on create.roblox.com).
- Keep Roblox Parental Controls on for under-13s.
- Mission 6 teaches never to share full name, school, address or passwords with AI or in game chat.
- Claude stays on your account. Your kid doesn't need their own.

The Creator Hours deal (optional)

Want to shift screen time from playing to making? Agree on a ratio together, like "an hour of building earns thirty minutes of playing." Track it below.

1 hour building = _____ minutes playing

Date	What we built	Minutes	Initials
